More importantly, the policy helps you focus on recuperation instead of the distraction and stress over the costs of medical and personal bills. “Guide to Health Insurance for People With Medicare” furnished by Aflac.**

1. Read Your Policy Carefully: This Outline of Coverage provides a very brief description of some of the important features of your policy. This is not the insurance contract and only the actual policy provisions will control. The policy itself sets forth, in detail, the rights and obligations of both you and Aflac. It is, therefore, important that you READ YOUR POLICY CAREFULLY.

2. RETAIN FOR YOUR RECORDS.

THIS OUTLINE OF COVERAGE IS ONLY A BRIEF SUMMARY OF THE COVERAGE PROVIDED.

CONSULT THE POLICY ITSELF TO DETERMINE GOVERNING CONTRACTUAL PROVISIONS.

TERMS YOU NEED TO KNOW

CORONARY ARTERY BYPASS GRAFT SURGERY: open-heart surgery to correct narrowing or blockage of one or more coronary arteries with bypass grafts, but excluding procedures such as but not limited to coronary angioplasty, valve replacement surgery, stent placement, laser relief, or other surgical or nonsurgical procedures.

COVERED PERSON: any person insured under the coverage type that you applied for on the application: individual (named insured listed in the Policy Schedule), named insured/spouse only (named insured and spouse), one-parent family (named insured and dependent children), or two-parent family (named insured, spouse, and dependent children). Spouse is defined as the person to whom you are legally married and who is listed on your application. Newborn children are automatically insured from the moment of birth. If coverage is for individual or named insured/spouse only and you desire uninterrupted coverage for a newborn child, you must notify Aflac in writing within 31 days of the birth of your child, and Aflac will convert the policy to one-parent family or two-parent family coverage and advise you of the additional premium due. The named insured has 31 days in which to pay the additional premium due. Coverage will include any other dependent child, regardless of age, who is incapable of self-sustaining employment by reason of mental retardation or physical handicap, and who became so incapacitated prior to age 26 and while covered under the policy. Dependent children are your natural children, stepchildren, legally adopted children, or children placed for adoption who are under age 26. A dependent child (including persons incapable of self-sustaining employment by reason of mental retardation or physical handicap) must be under age 26 at the time of application to be eligible for coverage.

EFFECTIVE DATE: the date(s) coverage begins as shown in the Policy Schedule or any attached endorsements or riders. The effective date is not the date you signed the application for coverage.

END-STAGE RENAL FAILURE: permanent and irreversible kidney failure, not of an acute nature, requiring dialysis or a kidney transplant to maintain life.

HEART ATTACK: a myocardial infarction. The attack must be positively diagnosed by a physician and must be evidenced by electrocardiographic findings or clinical findings together with blood enzyme findings. Heart attack shall not be construed to mean congestive heart failure, atherosclerotic heart disease, angina, coronary artery disease, cardiac arrest, or any other dysfunction of the cardiovascular system. Sudden cardiac arrest is not a heart attack.

LOSS: a specified critical illness event, coronary artery bypass graft surgery, or sudden cardiac arrest.

MAJOR HUMAN ORGAN TRANSPLANT: a surgery that was first recommended by a member of the medical profession after the effective date of coverage in which a covered person receives, as a result of a surgical transplant, one or more of the following human organs: heart, kidney, liver, lung, or pancreas. It does not include transplants involving mechanical or nonhuman organs.

ONSET DATE: the date of the occurrence for a heart attack, stroke, or sudden cardiac arrest; the date of diagnosis for end-stage renal failure, paralysis; or the date of surgery for a major human organ transplant or coronary artery bypass graft surgery.

PARALYSIS: complete and total loss of use of two or more limbs (paraplegia, quadriplegia, or hemiplegia) for a continuous period of at least 30 days as the result of a covered spinal cord injury. The paralysis must be confirmed by your attending physician.

PHYSICIAN: a person legally qualified to practice medicine, other than you or a member of your immediate family, who is licensed as a physician by the state where treatment is received to treat the type of condition for which a claim is made.

SPECIFIED CRITICAL ILLNESS EVENT: heart attack, stroke, major human organ transplant, end-stage renal failure, or paralysis.

STROKE: apoplexy due to rupture or acute occlusion of a cerebral artery. The apoplexy must cause complete or partial loss of function involving the motion or sensation of a part of the body. The stroke must be positively diagnosed by a physician based upon documented neurological deficits and confirmatory neuroimaging studies. Stroke does not mean head injury, transient ischemic attack (TIA), or cerebrovascular insufficiency.

SUDDEN CARDIAC ARREST: sudden, unexpected loss of heart function in which the heart abruptly and without warning stops working as a result of an internal electrical system malfunction of the heart. Any death where the sole cause of death shown on the death certificate is cardiovascular collapse, sudden cardiac arrest, cardiac arrest, or sudden cardiac death shall be deemed to be sudden cardiac arrest for purposes of the policy. Sudden cardiac arrest is not a heart attack.

TRANSIENT ISCHEMIC ATTACK (TIA): a temporary neurologic dysfunction caused by focal brain or retinal ischemia, with clinical symptoms lasting 24 hours or less, and without evidence of acute infarction. Also known as a "mini-stroke."
