Aflac
Plus Rider

OPTIONAL LUMP SUM
CRITICAL ILLNESS BENEFIT RIDER —
HSA-COMPATIBLE VERSION

We’ve been dedicated to helping provide peace of mind and financial security for nearly 60 years.
Boost Your Protection with the Aflac Plus Rider

Like many people, you probably have insurance to cover auto accidents, fires, burglaries, and standard hospital bills. But what would happen to your family’s finances if you experienced a catastrophic illness, such as a heart attack, stroke, Alzheimer’s disease, or Parkinson’s disease—an event that knocked you off your feet or even changed your life forever?

With deductibles, copayments, and out-of-pocket maximums on your major medical insurance increasing, how are you going to pay your bills if you experience a life-changing illness? The Aflac Plus Rider can help. This rider can be attached to select policies, further boosting your benefits. The Aflac Plus Rider pays a specific benefit amount when you are diagnosed with a covered illness. You can use the cash to help pay out-of-pocket expenses, such as utility bills, car payments, and mortgage or rent payments. For a list of policies the Aflac Plus Rider can be added to, please contact your Aflac insurance agent/producer.

How it works

Base Aflac policy is applied for. AFLAC PLUS RIDER coverage is added to enhance base benefits. Policyholder is diagnosed with a heart attack due to coronary artery disease. AFLAC PLUS RIDER coverage provides the following: $5,000 TOTAL BENEFITS

The above example is based on a scenario for Aflac Lump Sum Critical Illness Benefit Rider (HSA-Compatible version) that includes the following benefit conditions: Heart Attack due to coronary artery disease (Tier One Critical Illness Benefit) of $5,000. The Tier One Critical Illness Benefit pays $5,000 for a covered tier one critical illness.

The facts:

FACT NO. 1 ABOUT EVERY 34 SECONDS AN AMERICAN SUFFERS A HEART ATTACK.¹

FACT NO. 2 ON AVERAGE EVERY 40 SECONDS SOMEONE IN THE UNITED STATES HAS A STROKE.¹

¹Heart Disease and Stroke Statistics, 2014 Update, American Heart Association.

The rider has limitations and exclusions that may affect benefits payable. For costs and complete details of the coverage, contact your Aflac insurance agent/producer. This brochure is for illustrative purposes only. Refer to the policy and rider for benefit details, definitions, limitations, and exclusions.

Aflac herein means American Family Life Assurance Company of Columbus.

REREFER TO THE FOLLOWING OUTLINE OF COVERAGE FOR BENEFIT DETAILS, DEFINITIONS, LIMITATIONS, AND EXCLUSIONS.
American Family Life Assurance Company of Columbus  
(heren referred to as Aflac)  
Worldwide Headquarters • 1932 Wynnton Road • Columbus, Georgia 31999  
Toll-Free 1.800.99.AFLAC (1.800.992.3522)  

The rider described in this Outline of Coverage provides supplemental coverage and will be issued only to supplement insurance already in force.  

LIMITED BENEFIT, LUMP SUM CRITICAL ILLNESS RIDER  
Outline of Coverage for Rider Form CIRIDERHTX  

THIS IS NOT A POLICY OF WORKERS' COMPENSATION INSURANCE. THE EMPLOYER DOES NOT BECOME A SUBSCRIBER TO THE WORKERS' COMPENSATION SYSTEM BY PURCHASING THIS RIDER AND IF THE EMPLOYER IS A NON-SUBSCRIBER, THE EMPLOYER LOSES THOSE BENEFITS WHICH WOULD OTHERWISE ACCRUE UNDER THE WORKERS' COMPENSATION LAWS. THE EMPLOYER MUST COMPLY WITH THE WORKERS' COMPENSATION LAW AS IT PERTAINS TO NON-SUBSCRIBERS AND THE REQUIRED NOTIFICATIONS THAT MUST BE FILED AND POSTED.  

THIS IS NOT MEDICARE SUPPLEMENT COVERAGE.  
If you are eligible for Medicare, review the “Guide to Health Insurance for People With Medicare” furnished by Aflac.  

(1) Read Your Contract Carefully: This Outline of Coverage provides a very brief description of some of the important features of your rider. This is not the insurance contract and only the actual contract provisions will control. The contract itself sets forth, in detail, the rights and obligations of both you and Aflac. It is, therefore, important that you READ YOUR CONTRACT CAREFULLY.  

(2) Critical Illness Insurance Coverage is designed to supplement your existing accident and sickness coverage only when certain losses occur as a result of Critical Illnesses or other conditions as specified. Tier One Critical Illnesses are: Heart Attack due to coronary artery disease or acute coronary syndrome; ischemic Stroke due to advanced arteriosclerosis or arteriosclerosis of the arteries of the neck or brain; hemorrhagic Stroke due to uncontrolled high blood pressure, malignant hypertension, brain aneurysm, or arteriovenous malformation; Coma due to a covered Injury; Paralysis due to a covered Injury; Type 1 Diabetes; Traumatic Brain Injury; Alzheimer’s Disease; Parkinson’s Disease; Amyotrophic Lateral Sclerosis; Loss of Independence; Multiple Sclerosis; Permanent Loss of Sight, Hearing, or Speech; or Sudden Cardiac Arrest due to cardiac rhythm abnormalities or acute coronary syndrome. Tier Two Critical Illnesses are: Encephalitis, Bacterial Meningitis, Lyme Disease, Sickle Cell Anemia, Cerebral Palsy, Necrotizing Fasciitis, Osteomyelitis, Systemic Lupus, or Cystic Fibrosis. Coverage is provided for the benefits outlined in (3) Benefits. The benefits described in (3) Benefits may be limited by (4) Exceptions, Reductions, and Limitations of the Rider.  

(3) Benefits: While coverage is in force, we will pay the following benefits, as applicable, subject to the Pre-existing Conditions Limitation and Limitations and Exclusions, as well as all other policy provisions, unless modified herein.  

A. TIER ONE CRITICAL ILLNESS BENEFIT: Aflac will pay $5,000 upon a Covered Person’s Onset Date of one of the following Tier One Critical Illnesses:  
1. Heart Attack due to coronary artery disease or acute coronary syndrome;  
2. Ischemic Stroke due to advanced arteriosclerosis or arteriosclerosis of the arteries of the neck or brain;  
3. Hemorrhagic Stroke due to uncontrolled high blood pressure, malignant hypertension, brain aneurysm, or arteriovenous malformation;  
4. Coma due to a covered Injury;  
5. Paralysis due to a covered Injury;  
6. Type 1 Diabetes;  
7. Traumatic Brain Injury;  
8. Alzheimer’s Disease;  
9. Parkinson’s Disease;  
10. Amyotrophic Lateral Sclerosis;  
11. Loss of Independence;  
12. Multiple Sclerosis;  
13. Permanent Loss of Sight due to a covered Injury;  
14. Permanent Loss of Hearing due to a covered Injury;
15. Permanent Loss of Speech due to a covered Injury; or
16. Sudden Cardiac Arrest due to cardiac rhythm abnormalities or acute coronary syndrome.

This benefit is payable once per Covered Person, per lifetime.

B. SUBSEQUENT TIER ONE CRITICAL ILLNESS BENEFIT: After a Covered Person has previously qualified for benefits for a Tier One Critical Illness under Benefit A above, Aflac will pay $2,500 upon that Covered Person’s Onset Date of:
   1. a recurrence of that same Tier One Critical Illness, or
   2. an occurrence of a different Tier One Critical Illness.

For this benefit to be payable, the Onset Date of the subsequent Tier One Critical Illness must be 180 days or more from the Onset Date of any previously paid Tier One Critical Illness for such Covered Person. This benefit is not payable on the same day as the Tier One Critical Illness Benefit.

C. TIER TWO CRITICAL ILLNESS BENEFIT: Aflac will pay $1,250 upon a Covered Person’s Onset Date of one of the following Tier Two Critical Illnesses:
   1. Encephalitis
   2. Bacterial Meningitis
   3. Lyme Disease
   4. Sickle Cell Anemia
   5. Cerebral Palsy
   6. Necrotizing Fasciitis
   7. Osteomyelitis
   8. Systemic Lupus
   9. Cystic Fibrosis

This benefit is not payable on the same day as the Tier One Critical Illness Benefit.

D. CORONARY ARTERY BYPASS GRAFT SURGERY BENEFIT: Aflac will pay $1,250 when a Covered Person undergoes Coronary Artery Bypass Graft Surgery due to coronary artery disease or acute coronary syndrome.

This benefit is payable once per Covered Person, per lifetime.

(4) Exceptions, Reductions, and Limitations of the Rider (This is not a daily hospital expense plan):
4. Intentionally self-inflicting a bodily injury or committing or attempting suicide, while sane or insane;
5. Being exposed to war or any act of war, declared or undeclared; or
6. Actively serving in any of the armed forces or units auxiliary there to, including the National Guard or Reserve.

PRE-EXISTING CONDITIONS LIMITATION

A “Pre-existing Condition” is any illness, disease, infection, disorder, or injury for which, within the 12-month period before the Effective Date of coverage, prescription medication was taken or medical testing, medical advice, consultation, or treatment was recommended or received, or for which symptoms existed that would ordinarily cause a prudent person to seek diagnosis, care, or treatment. Benefits for a loss that is caused by a Pre-existing Condition will not be covered unless the Onset Date is more than 12 months after the Effective Date of coverage (or begins 6 months from the Effective Date for insureds who were issued the policy at age 65 or over).

(5) Renewability: The rider is guaranteed-renewable for your lifetime by the timely payment of premiums at the rate in effect at the beginning of each term, except that we may discontinue or terminate the rider if you have performed an act or practice that constitutes fraud or have made an intentional misrepresentation of material fact relating in any way to the rider, including claims for benefits under the rider. Premium rates may change only if changed on all riders of the same form number and class in force in your state.

(6) Grace Period: A grace period of 31 days will be granted for the payment of each premium falling due after the first premium. During the grace period, the policy shall continue in force.

(7) Premiums: Premiums are subject to change.

Rider (CIRIDERHTX):

The person to whom the policy is issued is permitted to return the policy within 30 days of its delivery to that person and to have the premium paid refunded.

RETAINT FOR YOUR RECORDS.
THIS OUTLINE OF COVERAGE IS ONLY A BRIEF SUMMARY OF THE COVERAGE PROVIDED.
CONSULT THE CONTRACT ITSELF TO DETERMINE GOVERNING CONTRACTUAL PROVISIONS.
**ACTIVITIES OF DAILY LIVING (ADLs):** activities used in measuring a person’s level of personal functioning capacity. Normally, these activities are performed without direct personal assistance, allowing personal independence in everyday living.

The ADLs are:

1. **Bathing:** washing oneself by sponge bath or in either a tub or shower, including the task of getting into or out of the tub or shower;
2. **Maintaining continence:** controlling urination and bowel movements, including the ability to use ostomy supplies or other devices such as catheters;
3. **Transferring:** moving between a bed and a chair, or a bed and a wheelchair;
4. **Dressing:** putting on and taking off all necessary items of clothing;
5. **Toileting:** getting to and from a toilet, getting on and off a toilet, and performing associated personal hygiene; and
6. **Eating:** performing all major tasks of getting food into one’s body.

**ALZHEIMER’S DISEASE:** Alzheimer’s disease that causes a person to be incapacitated. Alzheimer’s disease is a progressive degenerative brain disease that is first diagnosed on or after the effective date of coverage by a psychiatrist, neurologist or physician as Alzheimer’s disease. To be incapacitated due to Alzheimer’s disease, a covered person must:

1. Exhibit the loss of intellectual capacity involving impairment of memory and judgment, resulting in a significant reduction in mental and social functioning, and
2. Be unable to perform three or more activities of daily living (ADLs), as certified by a physician, and require direct personal assistance to perform such ADLs.

**AMYOTROPHIC LATERAL SCLEROSIS (ALS or Lou Gehrig’s disease):** a chronic, progressive neurological disease resulting in permanent clinical impairment of motor function and is definitively diagnosed by a neurologist as amyotrophic lateral sclerosis.

**BACTERIAL MENINGITIS:** inflammation of the thin, membranous covering (meninges) of the brain and the spinal cord caused by a bacterial infection and characterized by fever, vomiting, intense headache, and stiff neck.

**CEREBRAL PALSY:** a disability resulting from damage to the brain before, during, or shortly after birth and outwardly manifested by muscular incoordination and speech disturbances.

**COMA:** a continuous state of profound unconsciousness due to a covered injury, lasting for a period of seven or more consecutive days and characterized by the absence of: (1) spontaneous eye movements, (2) response to painful stimuli, and (3) vocalization. The condition must require intubation for respiratory assistance. The term coma does not include any medically induced coma.

**CORONARY ARTERY BYPASS GRAFT SURGERY:** open-heart surgery to correct narrowing or blockage of one or more coronary arteries with bypass grafts, but excluding procedures such as but not limited to coronary angioplasty, valve replacement surgery, stent placement, laser relief, or other surgical or nonsurgical procedures.

**COVERED PERSON:** any person insured under the policy to which the rider is attached.

**CYSTIC FIBROSIS:** a hereditary disorder affecting the exocrine glands which causes the production of abnormally thick mucus, leading to the blockage of the pancreatic ducts, intestines, and bronchi and often resulting in respiratory infection.

**EFFECTIVE DATE:** the effective date of the rider is as stated in the Policy Schedule.

**ENCEPHALITIS:** an inflammation of the brain, usually caused by a direct viral infection or a hyper-sensitivity reaction to a virus or foreign protein.

**HEART ATTACK:** a myocardial infarction caused by a blockage of one or more coronary arteries due to coronary artery disease or acute coronary syndrome. The attack must be positively diagnosed by a physician and must be evidenced by electrocardiographic findings or clinical findings together with blood enzyme findings. The definition of heart attack shall not be construed to mean congestive heart failure, atherosclerotic heart disease, angina, coronary artery disease, cardiac arrest, or any other dysfunction of the cardiovascular system.

**LOSS OF INDEPENDENCE:** being unable to perform three or more activities of daily living (ADLs), as certified by a physician, due to a covered injury and requiring direct personal assistance to perform such ADLs for a continuous period of at least 90 days.

**LYME DISEASE:** an inflammatory disease caused by bacteria that are transmitted by ticks that is characterized initially by a rash, headache, fever, and chills, and later by possible arthritis and neurological and cardiac disorders.

**MULTIPLE SCLEROSIS:** a chronic degenerative disease of the central nervous system, first diagnosed on or after the effective date of coverage, in which gradual destruction of myelin occurs in the brain or spinal cord or both, interfering with the nerve pathways, with muscular weakness, loss of coordination, or speech and visual disturbances present for a continuous period of at least 90 days.
NECROTIZING FASCIITIS: a severe bacterial infection of the fascia, the soft tissues that line and separate muscles, that causes extensive tissue death.

ONSET DATE: is as follows for each covered condition:

- Heart Attack: the date of occurrence of a heart attack as defined in the rider.
- Stroke: the date of occurrence of a stroke as defined in the rider.
- Coma: the date a physician confirms a coma as defined in the rider.
- Paralysis: the date a physician establishes the diagnosis of paralysis (as defined in the rider) on clinical or laboratory findings as supported by medical records.
- Type 1 Diabetes: the date a physician initially establishes the diagnosis of type 1 diabetes on clinical or laboratory findings as supported by medical records.
- Traumatic Brain Injury: the date of occurrence of a traumatic brain injury as defined in the rider.
- Alzheimer’s Disease: the date a physician initially certifies that a covered person is incapacitated due to Alzheimer’s disease as defined in the rider.
- Parkinson’s Disease: the date a physician initially certifies that a covered person is incapacitated due to Parkinson’s disease as defined in the rider.
- Amyotrophic Lateral Sclerosis (ALS or Lou Gehrig’s disease): the date of diagnosis of amyotrophic lateral sclerosis as defined in the rider.
- Loss of Independence: the date of diagnosis of loss of independence as defined in the rider.
- Multiple Sclerosis: the date of diagnosis of multiple sclerosis (as defined in the rider) by a physician.
- Permanent Loss of Sight, Hearing, or Speech: the date that permanent loss of sight, hearing, or speech (as defined in the rider) is initially diagnosed by a physician.
- Sickle Cell Anemia: the date of initial diagnosis by a physician.
- Coronary Artery Bypass Graft Surgery: the date of surgery.
- Systemic Lupus: the date of initial diagnosis by a physician.
- Cystic Fibrosis: the date of initial diagnosis by a physician.

OSTEOMYELITIS: inflammation of the bone due to infection.

PARKINSON’S DISEASE: Parkinson’s disease that causes a person to be incapacitated. Parkinson’s disease is a chronic progressive neurological disease that is first diagnosed on or after the effective date of coverage by a psychiatrist, neurologist or physician as Parkinson’s disease. To be incapacitated due to Parkinson’s disease, a covered person must:

1. Exhibit two or more of the following clinical manifestations:
   - Muscle rigidity
   - Tremor
   - Bradykinesia (abnormal slowness of movement, sluggishness of physical and mental responses), and
2. Be unable to perform three or more ADLs, as certified by a physician, and require direct personal assistance to perform such ADLs.

PARALYSIS: complete and total loss of use of two or more limbs (paraplegia, quadriplegia, or hemiplegia) for a continuous period of at least 30 days as the result of a spinal cord injury that occurred on or after the effective date of coverage. The paralysis must be confirmed by the attending physician.

PERMANENT LOSS OF SIGHT, HEARING, or SPEECH:

- Loss of Sight: the restriction of visual field to 20 degrees or less in both eyes, or the reduction of sight in the better eye to a corrected visual acuity of less than 6/60 (Metric Acuity) or 20/200 (Snellen or E-chart Acuity) due to a covered injury, and diagnosed by a physician.
- Loss of Hearing: the total, irreversible, and uncorrectable loss of all hearing in both ears due to a covered injury and diagnosed by a physician.
- Loss of Speech: the permanent, total, and irreversible loss of the ability to speak due to a covered injury and diagnosed by a physician.

SICKLE CELL ANEMIA: a chronic hereditary blood disease marked by sickle-shaped red blood cells and characterized by episodic pain in the joints, fever, leg ulcers, and jaundice.

STROKE: apoplexy due to rupture or acute occlusion of a cerebral artery. The apoplexy must cause complete or partial loss of function involving the motion or sensation of a part of the body and must last more than 24 hours. Stroke must be either:

- Ischemic: due to advanced arteriosclerosis or arteriosclerosis of the arteries of the neck or brain; or
- Hemorrhagic: due to uncontrolled high blood pressure, malignant hypertension, brain aneurysm, or arteriovenous malformation.

The stroke must be positively diagnosed by a physician based upon documented neurological deficits and confirmatory neuroimaging studies. Stroke does not mean head injury, transient ischemic attack (TIA), cerebrovascular insufficiency, or lacunar infarction (LACI).
SUDDEN CARDIAC ARREST: sudden, unexpected loss of heart function in which the heart abruptly and without warning stops working as a result of an internal electrical system malfunction of the heart. Any death where the sole cause of death shown on the death certificate is cardiovascular collapse, sudden cardiac arrest, cardiac arrest, or sudden cardiac death shall be deemed to be sudden cardiac arrest for purposes of the rider.

SYSTEMIC LUPUS: a chronic inflammatory multisystem disease that occurs when the body’s immune system attacks its own tissues and organs.

TIER ONE CRITICAL ILLNESS: Heart Attack due to coronary artery disease or acute coronary syndrome; ischemic Stroke due to advanced arteriosclerosis or arteriosclerosis of the arteries of the neck or brain; hemorrhagic Stroke due to uncontrolled high blood pressure, malignant hypertension, brain aneurysm, or arteriovenous malformation; Coma due to a covered injury; Paralysis due to a covered injury; Type 1 Diabetes; Traumatic Brain Injury; Alzheimer’s Disease; Parkinson’s Disease; Amyotrophic Lateral Sclerosis; Loss of Independence; Multiple Sclerosis; Permanent Loss of Sight, Hearing, or Speech; or Sudden Cardiac Arrest due to cardiac rhythm abnormalities or acute coronary syndrome.

TIER TWO CRITICAL ILLNESS: Encephalitis, Bacterial Meningitis, Lyme Disease, Sickle Cell Anemia, Cerebral Palsy, Necrotizing Fasciitis, Osteomyelitis, Systemic Lupus, or Cystic Fibrosis.

TRAUMATIC BRAIN INJURY: a nondegenerative, noncongenital injury to the brain from an external nonbiological force, requiring hospital confinement for 48 hours or more and resulting in a permanent neurological deficit with significant loss of muscle function and persistent clinical symptoms. Traumatic brain injury must be positively diagnosed by a physician based upon documented neurological deficits and confirmatory neuroimaging studies.

TYPE 1 DIABETES: a form of diabetes mellitus causing total insulin deficiency of a covered person along with continuous dependence on exogenous insulin in order to maintain life. A diagnosis of type 1 diabetes must be made by a physician who specializes in diabetes.

TERMINATION: the rider will terminate upon the earlier of the termination of the policy to which it is attached or the failure to pay the premiums for the rider.
