

National Cancer Institute (NCI) Designated Cancer Centers

The Cancer Centers Program of the NCI (National Cancer Institute) is a major source of cancer research throughout the United States. An NCI-designated Cancer Center may be of interest as you begin planning for treatment and care. There are many outstanding cancer facilities throughout the nation that are not affiliated with the NCI; the goal in providing this map is simply to make you aware of the existence and location of the NCI-designated Cancer Centers.

Additional information about the NCI and the Cancer Centers Program can be obtained by contacting the centers directly via the list on the back of this page or by visiting www.cancer.gov and <http://cancercenters.cancer.gov>.
